Determination of stockholders on record for the computation of entitlements		

Please make the necessary announcements to your clients and continue with your preparations for the migration to T+2 settlement cycle, including customizations to your back-office systems and updates to your operational procedures that will be impacted by the change in the settlement cycle.

The Working Groups for Settlement Operations between Custodian Banks and Brokers should exert utmost efforts to align their pre-matching processes with the shortened T+2 settlement cycle, determine new cut-off times for funding and settlement, as well as undertake all other necessary preparations consistent with the above timeline with the end objective of meeting SCCP's settlement deadline when we migrate to the shortened T+2 settlement cycle. Similarly, the Working Groups for Corporate Action should also exert their utmost efforts to resolve issues affecting entitlement calculation and claims processing consistent with the above timeline.
